

Electronic distributors

David Southcott kindly reports that 'Powerspark Ltd (01527 889453) can supply electronic distributors to replace Ruby type DK4A units operating on six or twelve volts and normally positive earth. The cost is £129.95 and they say that negative earth versions are also available.

Roly has also provided the following information - A brand new Electronic Distributor from AccuSpark for Austin the 7 is now in production with an initial supply of about 100 units. It comes complete with cap rotor and the AccuSpark Module fitted inside and is available for 6 or 12 Volt cars Negative Earth and Works with a Standard Coil. Whether this is only applicable to Ruby engines I leave to the discerning buyer to figure out.

The model is: DKY4 and retails at £129.95 incl VAT but is available to Members at £89.95 using Discount Code: 'club7' from web Site: <http://www.accuspark.co.uk/dkdistributor.html>
